

Let's break the chain of infection...

(DPShield HELP TO PROTECT FROM **BACTERIA** & **MICROORGANISMS**)

EPA Registered Formula

Benefits:

★ **Non-leaching & non-poisonous anti-microbial water based surface protectant**

- ★ Safe for environment
- ★ Non-toxic & non-hazardous
- ★ Safe for all equipments
- ★ Reduces the spread of germs

How It Works: Protect your establishment and facility like school, college, hospitals, home, restaurants and offices and all their surfaces against the growth of mold, mildew, fungi, algae and bacteria which cause staining, odor and discoloration. DPShield forms a highly durable bond with virtually any surface, working continuously, with just one easy application to provide an invisible biostatic protective film to prevent harmful bacteria, fungi, mold and mildew between cleaning. It is effective for 90 days. Advisable to reapply in 30 days.

Direction for Use: DP SHIELD can be applied to organic or inorganic substracts by: Brushing, Dipping, Padding, Soaking, Spraying & Fogging.
